Term 3 , 2024 Issue

## MESSAGE FROM OUR PRINCIPAL, MR CHOONG

Dear Parents/Guardians,

A big welcome back to Term 3, 2024. I do hope all our Jieminities and teachers have had a restful break to spend time with their loved ones. In Term 3, we have a series of planned activities and programmes to engage our Jieminities in active learning. We are looking forward to our P1 and P2 Jieminities going out for their learning journeys and of course, of P5 Jieminities will be treated to the National Education show on 6 July.

Besides these learning journeys, we also look forward to National Education programmes for the whole school such as the upcoming Racial Harmony Day and of course, our 59 th National Day Celebration. I would like to take the opportunity to thank our teachers for their hardwork to plan and coordinate these activities, and to thank all our Parent Volunteers who are stepping forward to give their time and commitment to support these meaningful school activities.

Our P6 Jieminities will be working hard in Term 3 to consolidate their learning and to prepare for the PSLE. As a community, we would like to support them in this important juncture their P6 journey and we do hope that the diligence of our P6 Jieminities in preparing for the PSLE will inspire our younger Jieminities to also put effort in their academic work, while continuing to pursue their passion in sports, arts and music as well. In this edition of Jieminite Link, we are sharing some study tips that our P6 Jieminities had learned during their recent June Motivational Camp. I am sure, all our Jieminities would also benefit from these tips and advice. Wishing everyone the very best for an exciting Term 3 in Jiemin Primary School!

Warmest regards!  
Andy Mickey Choong  
Principal

# MOTIVATIONAL STUDY TIPS

## Set Achievable Short-Term goals

Setting goals allow you to get a sense of satisfaction while you work towards your long-term goals. Short term goals are generally easier to obtain and help you get closer to the long-term goals.

## Put Aside Distractions

When you are studying, it is important to create an environment that is geared towards studying. This includes utilizing spaces that does not allow you to check on your phone or have loud noises.

## Space Out Study Time

You will be more productive if you break up your studying time into smaller and more manageable chunks. This will help you feel more motivated to complete those individual chunks.
